

**Flexi Chain**  
Your Logistics Partner

# Smart **Logistics** **and Workforce** Solutions

A comprehensive logistics and freight management software  
tailored for freight forwarders, logistics service provider and  
supply chain companies

# About FlexiChain

## A robust and user-friendly platform for logistics and HRMS

FlexiChain provides a comprehensive solution designed to simplify and streamline logistics and HR management. Our platform offers an intuitive dashboard that empowers companies to manage their operations more efficiently, ensuring smooth business processes and growth.

### Seamless Integration

FlexiChain easily integrates with your existing business systems, allowing for smooth data transfer and reducing manual work. Our platform is designed to help you optimize logistics operations and HR management with minimal effort.

### Real-Time Analytics

Our platform provides real-time data analytics, giving you valuable insights into your logistics and HR operations. With detailed reports and dashboards, you can make informed decisions and drive operational efficiency.

## Core Modules

### SALES & CRM

**Sales & CRM** System brings all sales and customer management activities into one secure, easy-to-use platform, helping organizations manage leads, customers, pipelines, and revenue efficiently while driving better engagement, faster decisions, and business growth.

- » Lead Management
- » Customer Management
- » Opportunity Management
- » Sales Pipeline Management
- » Quotation & Order Management
- » Task & Follow-Up Management
- » Communication Tracking
- » Sales Automation
- » Reports & Analytics
- » Integration & Data Sync

### HR & PAYROLL

**HR & Payroll** System unifies all HR and payroll operations into a secure, easy-to-use platform, enabling organizations to manage employees, automate payroll, ensure compliance, and gain actionable insights with minimal effort.

- » Employee Management
- » Attendance & Shift Management
- » Leave Management
- » Payroll Management
- » Statutory Compliance
- » Tax Management
- » Performance Management
- » Recruitment & Onboarding
- » Expense & Reimbursement
- » Learning & Training Management

# FlexiChain

## Core Modules

### FREIGHT FORWARDING

**Freight Forwarding** System streamlines end-to-end freight operations in a secure, easy-to-use platform, enabling logistics providers to manage shipments, documentation, costs, and compliance with real-time visibility and greater efficiency.

- » Shipment Management
- » Documentation Management
- » Carrier & Agent Management
- » Booking Management
- » Rate & Tariff Management
- » Cargo Tracking
- » Customs & Compliance
- » Billing & Invoicing
- » Cost & Profitability Analysis
- » Reports & Analytics

### TRANSPORT MANAGEMENT

**Transport Management System (TMS)** streamlines transportation planning, execution, and tracking through a secure, easy-to-use platform, helping organizations optimize routes, reduce freight costs, improve delivery performance, and gain real-time visibility.

- » Trip Planning & Scheduling
- » Vehicle & Fleet Management
- » Driver Management
- » Load & Dispatch Management
- » Route Optimization
- » Real-Time Tracking
- » Freight Cost Management
- » Fuel Management
- » Proof of Delivery (POD)
- » Trip Expense Management

# FlexiChain

## Core Modules

### FINANCIAL ACCOUNTING

**Financial Accounting** System centralizes and automates financial operations in a secure, easy-to-use platform, ensuring accurate control, compliance, and real-time financial insights.

- » General Ledger Management
- » Accounts Payable
- » Accounts Receivable
- » Bank Management
- » Cash Management
- » Bank Reconciliation
- » Expense Management
- » Budgeting & Forecasting
- » Tax Management
- » Fixed Asset Management
- » Cost Center Accounting
- » Multi-Currency Management

### THIRD-PARTY INTEGRATION

**Third-Party Integration** enables seamless connectivity with external applications and services, automating data exchange, improving efficiency, and ensuring real-time synchronization across business processes.

- » API Integration
- » ERP Integration
- » Accounting Integration
- » CRM Integration
- » Payment Gateway Integration
- » Logistics & Courier Integration
- » E-Commerce Integration
- » HR & Payroll Integration
- » Banking Integration
- » Data Import & Export
- » Real-Time Synchronization
- » Authentication & Security

# FlexiChain

## Core Modules

### INVOICING & BILLING

**Invoicing & Billing** System simplifies billing through a secure, easy-to-use platform, enabling accurate invoicing, efficient payment management, reduced errors, and improved cash flow.

- » Invoice Creation
- » Recurring Billing
- » Quotation to Invoice
- » Multi-Tax Support
- » Payment Tracking
- » Multiple Payment Modes
- » Credit & Debit Notes
- » Customer Billing Profiles
- » Proforma Invoicing
- » Late Fee & Reminder Automation
- » Multi-Currency Billing
- » Compliance & Audit Trail

### IMPORT & EXPORT PROCESS

**Import-Export Process Management** System streamlines end-to-end trade operations in a secure, easy-to-use platform, enabling efficient documentation, compliance, shipment tracking, and cost control with minimal effort.

- » Import & Export Workflow
- » Shipment Planning & Tracking
- » Documentation Management
- » Customs Clearance Management
- » HS Code & Tariff Management
- » Regulatory Compliance
- » Vendor & Customer Management
- » Freight & Logistics Coordination
- » Costing & Landed Cost Calculation
- » Licenses & Certificates Tracking
- » Payment & Settlement Tracking
- » Risk & Exception Management

# FlexiChain

## Core Modules

### OPERATIONS & WAREHOUSE

**Operations – Warehouse** Management System centralizes inventory, storage, and order fulfillment in a secure, easy-to-use platform, improving stock accuracy, space utilization, and operational efficiency.

- » Inventory Management
- » Inbound Management
- » Outbound Management
- » Stock Transfer Management
- » Barcode & QR Code Support
- » Warehouse Layout Management

### CLIENT/VENDOR PORTAL

**Client / Vendor Portal** offers a secure self-service platform for real-time access, collaboration, and transparent transaction management, reducing communication gaps, accelerating processes, and partner satisfaction.

- » Secure Login & Role-Based Access
- » Invoice & Payment Access
- » Profile Management
- » Document Sharing

### LORRY MODULE

**Lorry Module** centralizes heavy-vehicle operations in a secure, easy-to-use platform, enabling efficient fleet control, optimized load utilization, trip tracking, and improved operational efficiency.

### COURIER MODULE

**Courier Module** streamlines last-mile and intercity deliveries in a secure, easy-to-use platform, enabling efficient shipment management, optimized dispatch, real-time tracking, and improved customer satisfaction.

# Benefits of FlexiChain

## ➤ END-TO-END VISIBILITY

Centralized management and monitoring of logistics operations.

## ➤ COST OPTIMIZATION

Intelligent tools for freight optimization and inventory control lower costs.

## ➤ IMPROVED OPERATIONAL EFFICIENCY

Streamlined workflows reduce manual tasks and errors.

## ➤ SCALABLE SOLUTION

Modular design allows features to be tailored to growing business needs.
